Subject: Letter of Appreciation

Dear Ernie Brache,

Greenpoint Technologies recently completed a VIP interior installation (Project 8920) for an important BBJ customer and we worked in close partnership with over one hundred fifty different suppliers to accomplish this project. Working aside key suppliers, we have together invested a great deal of time and energy to make this a truly beautiful aircraft, and one the customer should enjoy for years to come.

The 8920 aircraft was delivered on Oct 14, 2009; and more significantly, early to our customer's re-delivery date. A few key suppliers, including AEC, Inc., demonstrated commitment, professionalism and tenacity to accomplish this effort. On behalf of Greenpoint Technologies and the 8920 project team, we want to personally thank your team for their efforts. Their dedication and ability to work to a hard schedule, while also delivering high quality workmanship and materials to meet our needs, is genuinely appreciated.

We look forward to working with AEC, Inc. again in the future.

Sincerely,

GREENPOINT TECHNOLOGIES

Cheryn Puhrmann
Senior Buyer

Dale Linder
